

Character Animation and VFX in Blender

Part 1

Alan Babu
200050005

Character:- I settled on K-VRC, the orange robot from the Netflix series LOVE DEATH AND ROBOTS.

Model By TIMOTHEUS-25(Timothy Oosthuizen)

Animation Sequence:- I plan on animating him dancing or maybe doing some other activity.

Scene :- A video of the table in my room.

I'll motion track the video to recreate the camera motion in blender.

Animate the character and position it appropriately.

Adjust lighting in Blender to match the scene.

Add a shadow catcher plane to get the shadows of the mesh.

Render the character and overlay on top of the captured video.
